MILLER'S TRAC - TILL

Naugher Nursery takes great pride in presenting a quality tool that we believe to be the answer to a problem of great longevity . . . proper tillage.

Tillage of soils is for the purpose of changing the structure of the soil; killing weeds and grasses; managing crop residues (falling leaves, green manures, etc.); providing good seed beds; facilitating the storage of water; and to deepen root zones. This can best be accomplished with a tool that utilizes a system of rotors and knives.

For years, Naugher's have used tillers (the garden type) for preparation of seed beds and cultivation of liners in the open field. While this type equipment serves its purposes, it is not designed for day-in, day-out field conditions. Our maintenance costs were terrific; operator fatigue was always a problem; lack of speed and inability to adapt tillers for other uses were some of the headaches endured to obtain the tillage we deem so important.

We can recommend the Miller's Trac - Till very highly as today's best tiller buy. Over the row clearance is 24"; row widths are adjustable from 1 to 22 inches; the Trac - Till has a three point hitch as standard equipment, and brackets for other tractors with hydraulic lifts are available. The Trac-Till we picture here is set for row crop cultivation. To make it a full 50" bar is a relatively simple matter, as the hoods, rotors, etc. slide together and by the addition of two sets of knives the row crop model is now a full bar model.

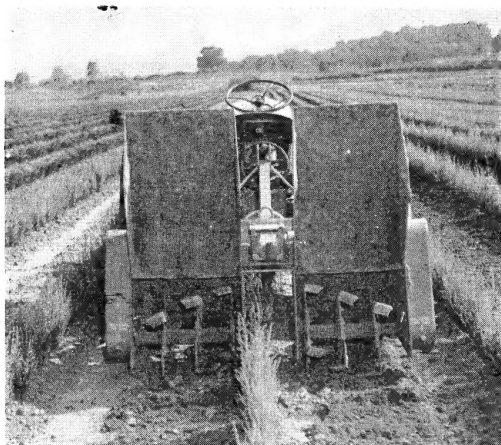

Many of you are users now of the Miller's Trac-Till; others are awaiting delivery of your Trac - Till; and growers are singing the praises of Trac - Till all over the country. Users report adaptability and flexibility that makes the Trac - Till a year 'round piece of equipment.

At Naugher's we are so highly sold on the Miller Trac - Till, that we have negotiated with the manufacturers and are now distributing this quality piece of equipment. We have the tillers in stock here at Chase, and while all the parts are standard and can be purchased at most any parts house, we have a complete and full line of replacement parts for your convenience.

We invite your inspection of this ruggedly built tiller here at the nursery, or if you will drop us a line, we will be happy to send you the name of the user nearest you. We believe that you will be sold on the Miller's Trac - Till once you see it in operation. We would be pleased to have your questions and comments and prompt attention will be given your inquiry as well as prices, delivery dates, additional specifications, etc.
